2027 TOPICS

01

Living Resources

02

Water Resources

03

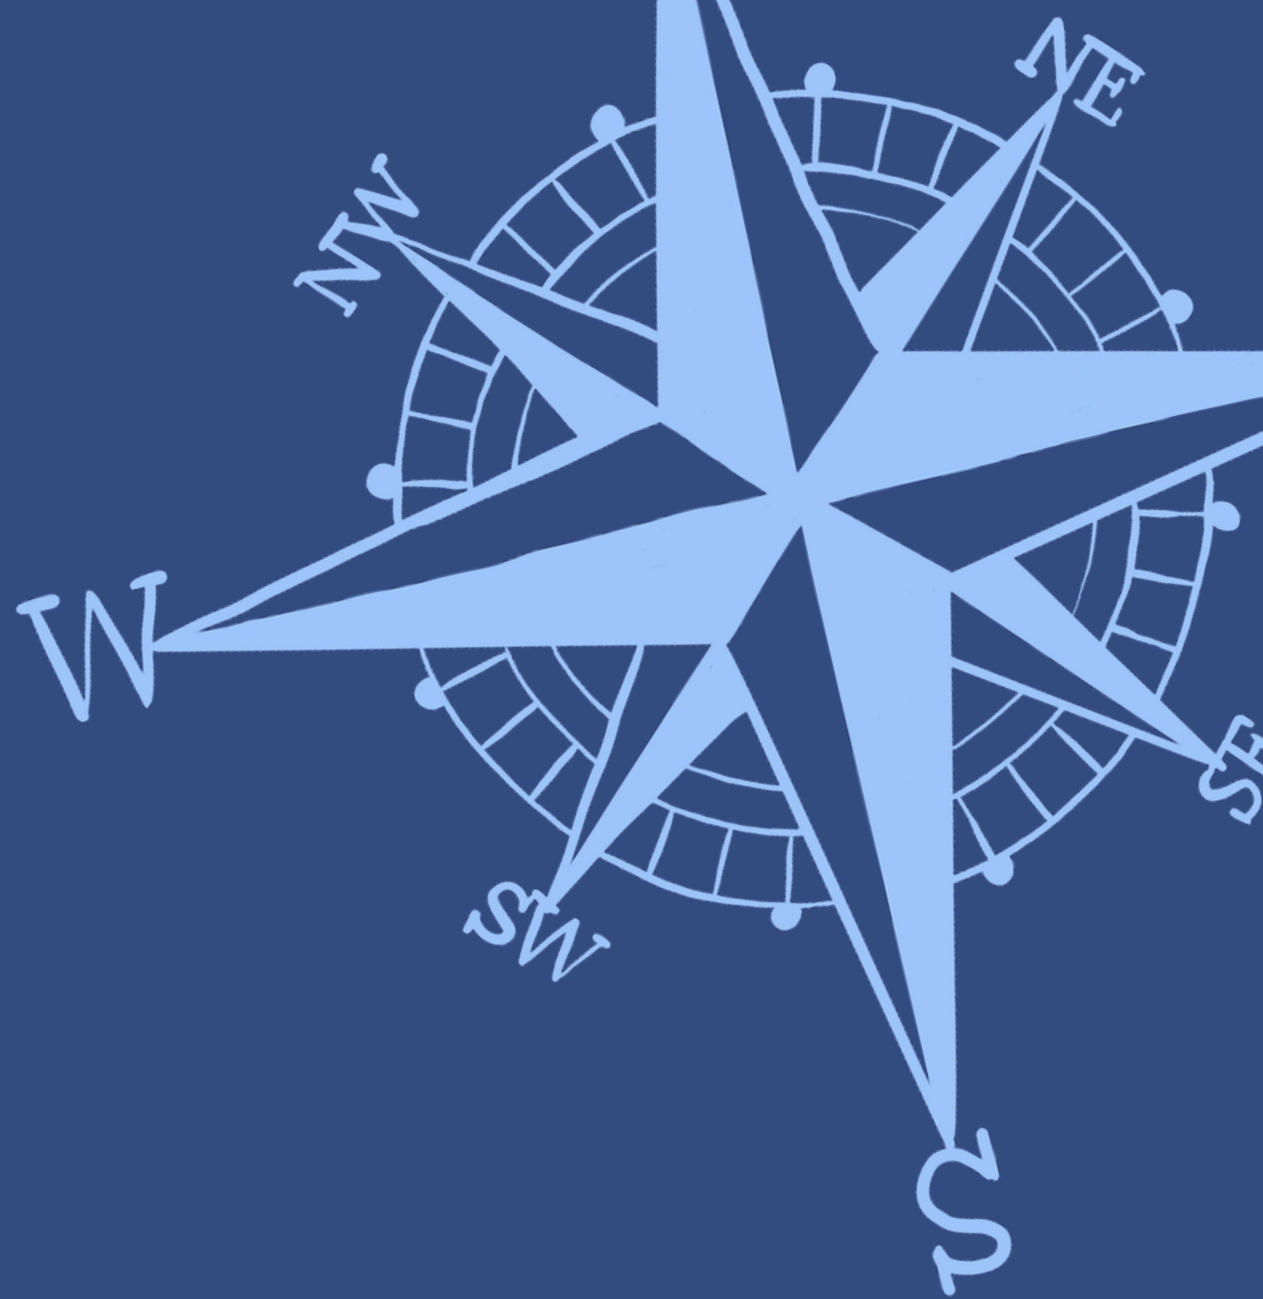

Habitat Management and Restoration

04

Resilient Coastal Communities

05

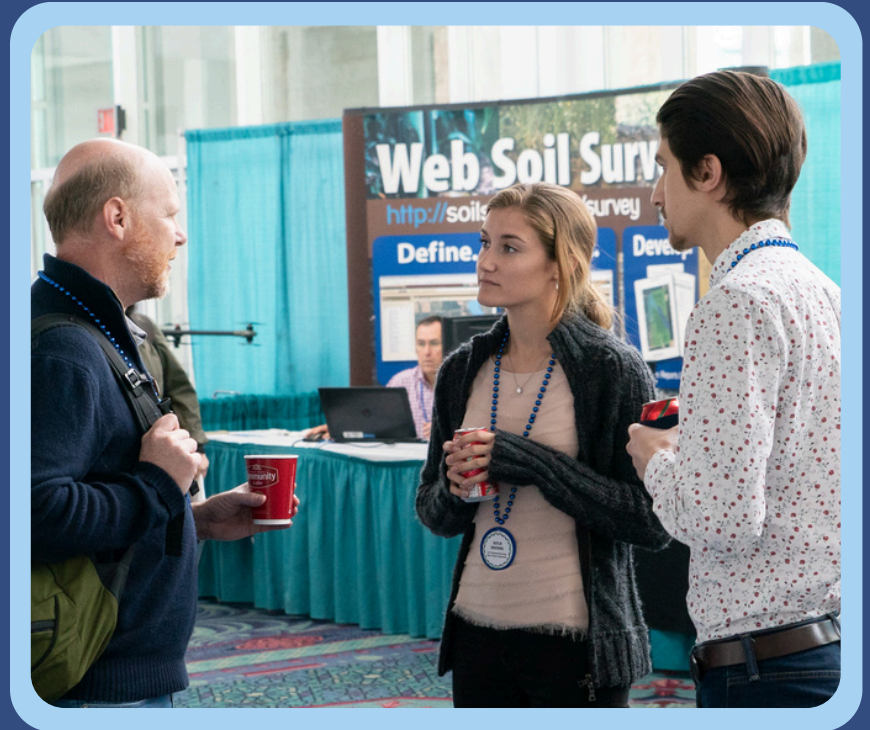

One Health Centers of Excellence/Oysters

ABOUT THE SYMPOSIUM

The Bays and Bayous Symposium provides an opportunity for scientists and community leaders to connect along the Northern Gulf Coast. The next event will be held at the Mobile Convention Center on January 12-14, 2027.

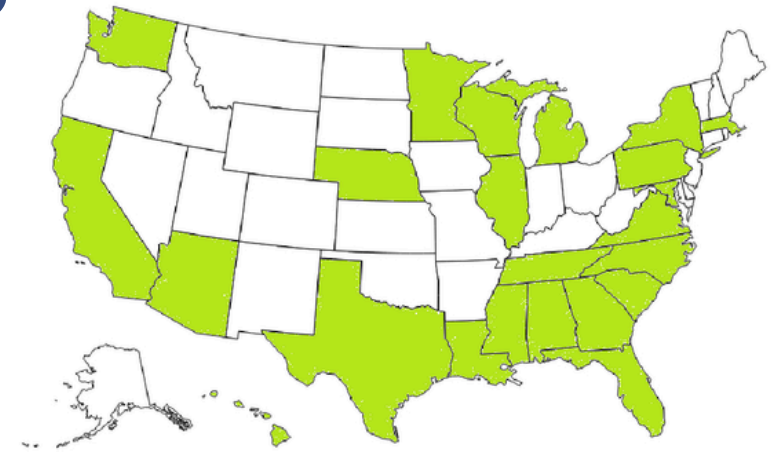

This symposium gathers scientists, resource managers, policy makers, business, government, industry, and community leaders from throughout the Southeast and beyond, enabling them to share ideas and make connections critical to the long-term sustainability of the Coast.

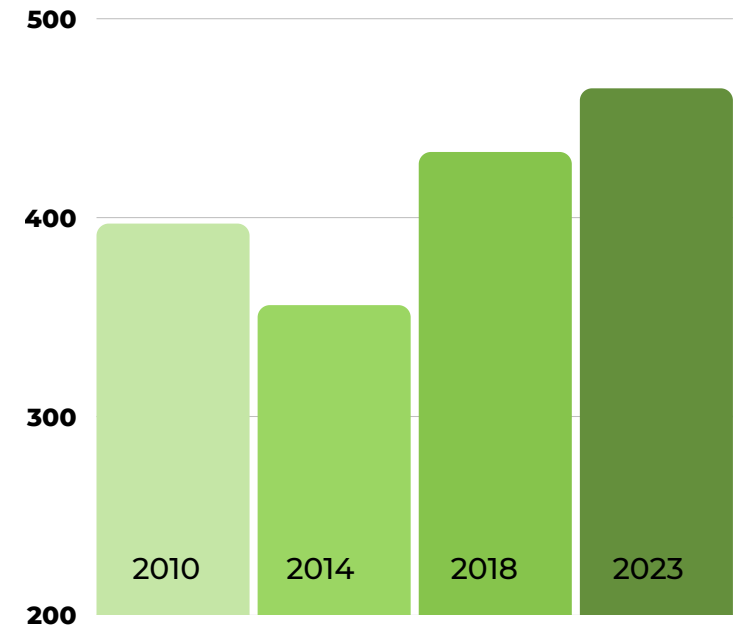

It provides a scientific overview and practical perspective of our knowledge and activities addressing the water quality, living resources, habitats, human impacts, and challenges of the northern Gulf of Mexico.

WHO ATTENDS

Attendees convene from multiple states in the region and beyond. Over 450 scientists and professionals attend Bays and Bayous biennially from various scientific and professional backgrounds. The future of the Gulf Coast's leaders, scientists, and policy makers will be present.

Bays and Bayous receives visitors from across 22 states

Bays and Bayous attendance in Mobile from 2010 to 2023

THEME

Charting Coastal Futures: Science, Partnership, and Action

Research, shared knowledge, and coordinated action will guide the future of the northern Gulf Coast, and at Bays and Bayous we will, together, chart that future.

SPONSORSHIPS

BAY LEVEL SPONSOR

\$6,000

- Five complimentary registrations
- Acknowledgement on all symposium materials (program, website, and event recognition)

Vendor booth space

BAYOU LEVEL SPONSOR

\$3,000

- Three complimentary registrations
- Acknowledgement on all symposium materials (program, website, and event recognition)
- Vendor booth space

BEACH LEVEL SPONSOR

\$1,500

- One complimentary registration
- Acknowledgement on all symposium materials (program, website, and event recognition)
- Discounted vendor booth space

AN OPPORTUNITY

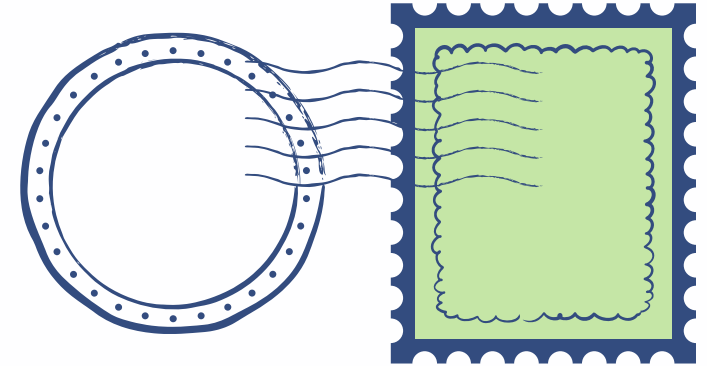

BAYS AND BAYOUS 2027

The Mobile Bay National Estuary Program and partners invite you to join them in the historic city of Mobile, Alabama, to share information on the status of research, monitoring activities, on-the-ground restoration, citizen actions, and education focused on the health of our Coastal environment.

This two-day event will include presentations and discussion by resource managers, scientists and active participants in environmental stewardship who will share our latest understanding of the condition of the lands, waters and living resources of the northern Gulf of America. The Bays and Bayous Symposium showcases the latest information about the estuary's changing watersheds, impacts from major stressors, recovery programs for species and habitats, and emerging challenges.
