What is Social and Behavior Change Communication (SBCC)?

SBCC is the strategic use of communication to inspire social and behavior change to improve lives around the world - from increasing use of modern contraception, to fostering gender equality, to addressing the pressing issue of the climate crisis - playing a crucial role in achieving the Sustainable Development Goals.

What is the SBCC Summit?

The Summit is the largest international event for the SBCC field and a space for making new connections, developing partnerships, sharpening cutting-edge insights and advancing innovations.

Opportunity for Sponsors

In 2016, the first International SBCC Summit brought together the global community of SBCC organizations, practitioners and researchers. In 2018, this momentum continued as 1,200 participants from 93 countries came together to assess "what works," advance SBCC as a field and accelerate development impact.

In 2020, close to 2,000 participants are expected to convene in Marrakesh to harness the power of SBCC to accelerate action towards achievement of the Sustainable Development Goals. You are invited to showcase your organization or business to a passionate audience of committed professionals and network with decision makers looking for solutions to the most critical issues of our time.

2018 Summit Highlights

The enthusiastic response to the first SBCC Summit led to a commitment to convene an SBCC Summit every two years.

The 2018 SBCC Summit in Nusa Dua, Indonesia, drew a record number of abstract submissions and nearly twice as many attendees than had attended just two years before.

A week at the Summit was truly a crash course in the best our field has to offer. It covered topics from gender, youth and social norms to nutrition, family planning and climate crisis. There were talks on behavioral economics, big data, entertainment-education, human-centered design, measurement and evaluation and so much more.

By the Numbers

Summit participants are highly educated decision-makers who lead within their organizations. A concerted effort was made in 2018 and will continue to reach practitioners in the Global South. Two-thirds of abstracts received in 2018 came from low- and middle-income countries, with a third of all abstracts coming from Africa.
